

The pump set GEBAR type GAC-01

Intended use:

The pump set GEBAR type GAC-01 is destined to clean cooling systems of electrical engines by the expression of chemically active substances. The whole set can be used in underground excavations classified as levels a and b of methane explosion hazard and levels A or B of coal dust explosion hazard. The splitter installed in the device allows the user to change the direction of pumping during the work of the pump set.

Technical specification

Device group and category		-	I M2
Installation power		kW	0,75
Drive	Hydraulic – the pumping pressure	MPa	25
	Electric – the tensity	V	127 / 230 / 500
Volume of the tank		dm ³	50
Efficiency		m ³ /h	3
The lifting height		m	20
Dimensions: length x width x height		mm	670 x 460 x 695
Mass	With hydraulic drive	kg	39
	With electric drive	kg	63
