The cleaning substance StonEx

Intended use:

The cleaning substance StonEx is destined for fast and efficient cleaning of electrical engines cooling systems. It can be used in underground excavations classified as levels a, b or c of methane explosion hazard and levels A or B of coal dust explosion hazard.

The cleaning substance StonEx easily removes rust, stone, oil pollution and dirt in cooling systems, which recovers the efficiency of the system and prevents the engine from overheating.

Technical specification

Form	Liquid
Colour	Transparent
Smell	Specific for this particular substance
pH	Circ. 1
The ignition temperature	The product is not flammable
Solubility in solvents	Full solubility in water
The self-ignition temperature	The product is not self-flammable
Explosive properties	The product is not explosive
Oxidizing properties	None
